Chronic Care Management

Chronic care management (CCM) is a critical component of care that contributes to better outcomes and higher satisfaction for patients. The Centers for Medicare & Medicaid Services (CMS) established separate payment under billing codes for the additional time and resources practices spend to provide the between-appointment help many Medicare and dual eligible (Medicare and Medicaid) patients need to stay on track with their treatment plans for better health.

Well Living Initiative Supports Practices

- Improve care coordination with other providers
- Support patient compliance and help patients feel more connected
- Decrease financial distress for patients and increase financial stability for the providers.
- Handles all the administration work and conversations with the patients - no need to hire additional staff.
- Receive patient concerns prior to appointment.

Increase profitability, Improve patient care, Achieve higher MIPS scores.

Each physician that has 300 patients enrolled in the practice equates to \$108,000 of increased net revenue for a single provider.

Client Testimonials

"I haven't eaten in 3 days, thank you for hooking me up with the meals on wheels program. It is great to see that my doctor cares about me and connected us together."
- Primary Care Patient

"The patients love this service. Thanks to the caring Well Living team. You are awesome!"
- Family Practice Physician

Well Living Initiative Supports Patients

- Patients gain a team of dedicated health care professionals who help plan for better health.
- Monthly check-ins and ready access to care teams improve care coordination, including improved communication and management of care transitions, referrals, and follow ups.
- Patients will receive a comprehensive care plan that will help support their disease control and health management goals.
- Having a regular touch point helps patients engage in their treatment plan.
